PROFESSIONAL SUMMARY

Computer Science student at UMass Lowell with hands-on software engineering experience building cross-platform mobile applications and machine learning-powered tools. Contributed to production-level code at an AI startup and demonstrated technical leadership as Director of Partnerships for UMass Lowell ACM. Passionate about writing clean, efficient code and solving real-world problems across the full software stack.

EDUCATION

University of Massachusetts Lowell

Lowell, MA

Bachelor of Science in Computer Science, General. GPA: 3.1.

Expected May 2027

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Assembly Language, Computer Architecture, Logic Design, Organization of Programming Languages, Computing for Health and Medicine

EXPERIENCE

Software Engineer Intern

November 2025 – April 2026

Uplifty AI

Remote

- Built and maintained cross-platform iOS and Android mobile applications using React Native, delivering performant UI with clean design
- Collaborated with cross-functional teams to implement new features and improve existing mobile workflows
- Debugged and optimized mobile code, reducing load times and improving overall user experience

Barista / Team Member

April 2025 – Present

Tatte Bakery and Cafe

Arlington, MA

- Managed high-volume customer flow during peak hours, maintaining accuracy and composure under pressure
- Collaborated with a team to ensure timely order delivery and maintain a clean, organized environment
- Communicated directly with customers to resolve issues and deliver a positive service experience

PROJECTS

Smart Email Sorter

October 2025

- Built a modular Python application that classifies Gmail messages into categories using a Naive Bayes classifier and TF-IDF vectorization
- Integrated Gmail API to fetch messages, parse metadata, and apply category-specific labels
- Implemented persistent model storage with joblib and structured logging

Planet Simulator

March 2025

- Designed and developed a real-time planet simulator modeling orbital mechanics using physics and mathematics in C++
- Rendered smooth, accurate visualization of planetary rotations and orbits across the solar system using SFML

ACTIVITIES & LEADERSHIP

Association for Computing Machinery (ACM), UMass Lowell

April 2025 - May 2026

Director of Partnerships

- Lead partnership development for the UMass Lowell ACM chapter, creating networking opportunities and coordinating events that connect students with alumni and industry professionals. Cultivate relationships with tech companies and organizations to bring speakers, workshops, and career resources to chapter members.

SKILLS

Programming Languages: Python, JavaScript, C/C++, HTML, CSS, React Native

Tools and Frameworks: VS Code, Visual Studio, Android Studio, Gmail API, scikit-learn, joblib, SFML

Languages: English (Fluent), Nepali (Native)
